

PART V-A DO THE MATH FAST FACTS I- FOR SEX TRAFFICKING- COUNTERING THE BS WITH GOVERNMENT STATISTICS

Numbers matter- and when prostitution abolitionists, victim pimps- the media and some government agencies start claiming that there are *“hundreds of thousands of child sex trafficking victims being forced into prostitution every year”* -they need to be challenged on the veracity of their claims.

Interestingly, ALL the information that disproves their lies is available from... government agencies. Trouble is, these resources are not easy to find or to know which of the thousands and thousands of tables, graphs, charts, reports etc on their websites. have the information we need. ISWFACE has put together the spreadsheets, graphs and charts from the FBI Bureau of Justice Statistics website with links to sources available from our www.policeprostitutionandpolitics.com website. While rapists go free, law enforcement officers spend your tax dollars pursuing consenting adults engaged in commercial sex and ingesting "illegal" substances that alter their perception of life in the same way that alcohol (legal) does. These laws corrupt everything and everyone they touch. Even if you have a moral aversion to prostitution and drug use, is the resulting corruption engendered by bad laws worth the price of enforcing your moral values? Is it moral to allow law enforcement officers to engage in crimes for which they arrest others, which leads to loss of credibility and respect for our justice system? How much police corruption is acceptable to impose your moral or social values on others?

Number of unsolved rape cases 1991-2014= 5,599,969

IS THIS ACCEPTABLE?

Do you suppose those rape victims- whose rapists were never arrested because there were not enough resources for cops to search for them, for cities to test the rape kits after the victims underwent the traumatic procedure to obtain DNA evidence, not enough resources for prosecutors to prosecute the perpetrators if they had been arrested, and no room for them in the overcrowded prisons anyway- find comfort in knowing how many consenting adult sex workers and their non violent, non abusive clients were arrested instead of their rapists? Not to mention the millions of people who were arrested for mere possession of drugs? People who did not report being victims of any crime? Resources which could have been used to solve the 5,599,969 rapes, many of which were no doubt committed by serial rapists?
